

Advanced APEX Interfaces

Drive your APEX development even further!

What you need:

- ▶ To maximize the efficiency of your users' massive data entry activities in Web mode
- ▶ To extend and adapt APEX functionalities according to your needs
- ▶ To minimize the impacts of changes when migrating a client/server platforms to APEX
- ▶ To provide users with rich interfaces at low cost
- ▶ To be at the cutting edge of Web technologies
- ▶ To have reusable and compatible modules and libraries

What we offer:

- ▶ An approach that stresses reusability by building a library of next-generation functions
- ▶ A simulation of certain client/server behaviors in Lite Web mode
- ▶ Efficient approach for Web services usages
- ▶ An opening for the use of extension modules and plug-ins in APEX
- ▶ A way to harness mobility with the simplicity of APEX
- ▶ Integrated geomatic Web services (Google Maps)
- ▶ A library compatible with all modern browsers
